

1. Splash Screen:

- Display your app's logo and a brief loading message.

2. Onboarding Screens (Optional):

- If applicable, introduce users to the app's features and benefits.

3. Home Screen:

- The central hub of the app where users start their journey.
- Key elements:
 - Search bar for finding businesses or locations.
 - Categories or nearby locations for quick browsing.
 - A prominent call-to-action button to begin searching.

4. Search Results Screen:

- Display a list of businesses or locations matching the user's search query.
- Key elements:
 - Business names, addresses, and hours.
 - Reliability indicators for each listing.
 - Filters or sorting options for refining results.

5. Business Details Screen:

- Present detailed information about a selected business or location.
- Key elements:
 - Business name, address, contact information.
 - Business hours with a "Verified by Business" badge if provided by the business.
 - User reviews and ratings.
 - Option to report inaccurate hours.

6. Reporting Inaccuracy Screen:

- Allow users to submit information about inaccuracies in business hours.
- Fields for users to describe the issue.
- A "Submit" button to send the report.

7. Business Owner Verification Screen:

- If a business owner wishes to verify and manage their hours, guide them through this process.
- Fields for entering and verifying business information.

- Option to upload verification documents.

8. User Profile Screen:

- Enable users to manage their profiles and preferences.
- Features may include profile editing, saved favorites, and notifications settings.

9. Settings Screen:

- Provide options for customizing app preferences, such as location services and notifications.

10. Feedback/Contact Screen: - Offer a way for users to provide feedback, contact support, or get assistance.

11. About/Info Screen: - Include information about the app, its purpose, and any relevant legal or privacy details.

12. Navigation Menu: - Implement a slide-out or drop-down navigation menu for easy access to various app sections.

Flow:

1. User opens the app, sees the Splash Screen, and proceeds to the Home Screen.
2. On the Home Screen, the user can choose to search for a business or browse categories/nearby locations.
3. After searching or selecting a category, the user views the Search Results Screen.
4. The user clicks on a specific business, leading to the Business Details Screen.
5. If the user encounters inaccurate information, they can report it via the Reporting Inaccuracy Screen.
6. Business owners interested in verification can access the Business Owner Verification Screen.
7. Users can access their profiles, settings, and provide feedback via the Profile, Settings, and Feedback/Contact Screens.
8. The About/Info Screen provides additional information about the app.
9. Users can navigate between screens and access the navigation menu for quick access to different sections.
